

Fabien MARRY

Profile

I am a user experience designer combining 7 years of experience creating web and multimedia products with new skills gained during an MSc in Human Computer Interaction. I have a strong interest in the details of the user interface, and how it can be improved.

Education

MSc in Human Computer Interaction with Ergonomics

University College London — 2009 (results pending)

includes learning about **HCI research** and diverse experience of **User Centred Design** practical work, involving **project planning** and **team management**, **user research**, creation of **design deliverables**, and **evaluation**.

BSc equivalent in Communication and Media

University of Cergy-Pontoise, France — 2007

Practical and artistic training in multimedia tools, basics of marketing and communications.

Certificate in Multimedia

École des Gobelins, Paris, France — 2002

Hands-on training in the use of multimedia authoring software, and project management.

Advanced Diploma for Technicians in Audiovisuals

Boulogne-Billancourt, France — 2001

Technical training in various equipment needed to operate a television channel, Film Studies, applied physics and signal processing.

Experience

Multimedia and Audiovisual Specialist, The World Bank

Paris, France 2003 - 2008

I was responsible for providing AV and multimedia solutions to World Bank European offices, including technical oversight of many corporate websites, producing photo and video coverage for major events, producing CD-Roms and multimedia applications, and advising communications teams on optimal technological solutions for business needs.

I was also responsible for planning and supervision of external teams providing audiovisual and IT services for major conferences of the World Bank.

Selected accomplishments:

- Developed a new content management system for World Bank project websites (www.dmade.org and many others). It needed to be a low-cost and easy to manage system allowing quick creation of several independent sites focusing on making it easy to use, with just the amount of features needed based on user interviews.
- Provided advice on the implementation of the first World Bank blog for youth audiences (www.essaycompetition.org/blog/) (briefing to management, advice on business opportunities and risks, providing training to the blog's editor, support to blog moderation).
- Coordinated IT and AV between two World Bank offices, the government of South Africa and external providers for the Annual Bank Conference on Development Economics (ABCDE) 2008 in Cape Town, South Africa, including developing IT/ AV specifications, advising the ABCDE project manager, coordinating team work and supervising delivery.
